

# Review of: "Leveraging Fine-Tuned Large Language Models in Bioinformatics: A Research Perspective"

Xihua Li

Potential competing interests: No potential competing interests to declare.

The article gives a comprehensive perspective on the use of LLMs in bioinformatics. It explores the application areas and challenges of LLMs. However, there is no detailed literature analysis and review in this article, so it is difficult for readers to grasp the research status and development trends of this topic. In addition, the overall framework and basic process of the LLMs in the applications should be introduced.
