I have performed a review of your manuscript entitled "Experimental Behavior of Solar Still Using Mixed Oxides Mn-Fe/Silicone Resin Composite as Selective Solar Absorber" and have concluded that this work is interesting and can be publishable after a minor revision.

- 1- Overall, the English in the manuscript needs to be double-checked carefully.
- 2- All abbreviations must be spelled out as full names in the abstract and also everywhere they appear for the first time.
- 3- While the results obtained by the authors seem interesting, it would be very interesting to see how their results compare with those already published.
