# Verrucous Carcinoma of the Penis

National Cancer Institute

## Source

National Cancer Institute. *Verrucous Carcinoma of the Penis*. NCI Thesaurus. Code C6982.

A slow growing, locally recurring, very well differentiated papillary squamous cell carcinoma that arises from the penis. It is characterized by the presence of acanthosis and hyperkeratosis. The neoplastic infiltrate extends into the underlying stroma with a pushing border. Koilocytotic atypia is not present.
