

Review of: "The Role of Green Legacy in Promoting Sustainable Development and Combating Climate Change"

Hribhu Chowdhury

Potential competing interests: No potential competing interests to declare.

The paper addresses a significant and timely subject considering the global concerns of climate change. The utilization of both qualitative and quantitative research methods provides a comprehensive understanding of the subject and enhances the robustness of the study. However, the paper could benefit from improved organization and clarity, especially in terms of section headers and subheadings, making it easier to follow the flow of the paper. Additionally, the paper should provide a more detailed explanation of the data analysis methods, ensuring clarity in the interpretation of the findings. The results should be presented in a more organized and easily digestible format, possibly utilizing tables or graphs to enhance clarity. Also, the paper could cite more recent and diverse sources related to climate change, sustainable development, and reforestation, enriching the context and supporting the arguments made. Improvements in these areas would enhance the overall clarity, rigor, and impact of the research presented in the paper.
