

# Review of: "A Case for Nature in Long-Haul Space Exploration"

Neil Phillips

**Potential competing interests:** No potential competing interests to declare.

The article's suggestions are not new, but they emphasise the benefits of a 'human-friendly' environment. The article is necessarily succinct due to journal guidelines. Integrating audio-visual and possibly VR/AR simulations into daily exercise (to countermeasure for lack of gravity) could be discussed. Additionally, learning from ISS could be included.
