

Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Sanjay Chouhan

Potential competing interests: No potential competing interests to declare.

The title effectively summarizes the main focus of the paper, which is appreciated. However, it could be slightly more specific to reflect the unique contributions or methods used in the investigation.

The abstract provides a concise overview of the study objectives, methodology, and key findings. It effectively sets the stage for the reader, but a bit more detail on the significance of the research would be beneficial.
