**Potential competing interests:** No potential competing interests to declare.

(1) the topic is interesting and meaningful.

(2) the situation of the village in this paper should be given more explanation.

(3) in this paper, MSE'S is mentioned a lot, I think it is better to add the words on the title of the paper.

(4) the title of the paper is the relationship between the role of women's business and sustainable development, but the paper pays much attention on the performance of the MSE business operated by women. I think it is much better if the authors change the title according to the contents.

(5) actually, women play a very important role in developing countries, this is a very good topic and needs to be explored.
