Potential competing interests: No potential competing interests to declare.

The author has made significant strides in the field of people activity detection, demonstrating a commendable level of expertise and thoroughness in their work. However, providing a more detailed analysis of the results could greatly enhance the readers' understanding of the research outcomes. By offering a deeper exploration of the results, including more comprehensive data interpretations, insights into the effectiveness of different methods, and discussions of potential limitations, the author can offer a clearer and more nuanced view of the findings. This additional detail would not only enrich the readers' comprehension of how well the activity detection system performs but also highlight the practical implications, strengths, and areas for improvement. Such an approach would contribute to a more complete and informative presentation of the research, allowing readers to better appreciate the significance of the results and their impact on the field.
