

# Review of: "Impact of Men's Labour Migration on Non-migrating Spouses' Health: A Systematic Review"

A-Isabel Tavares<sup>1</sup>

<sup>1</sup> University of Lisbon

**Potential competing interests:** No potential competing interests to declare.

Nicely written. Well-structured systematic review. Methods are correctly applied.

Suggestions:

1. Definition of STI is missing.

2. Provide a short explanation what and why for the tools used in quality assessment.

3. Add table summing up countries by continent: Africa, Asia (no countries in Europe and Americas). Any suggestion for no studies for countries in other continents? (there is Jamaica for Central America, but none for South America)

4. Add table summing up health effects and articles (the table may have identical content to existing table 1 but it provides, in fact, the response for the research question).

Health effects ----- List ----- Articles

Physical health -----

Mental health-----

Sexual and reproductive health-----

Health care-----
