

Review of: "Shaping Tomorrow's Workforce: Adapting University Curriculum to Address China's College Graduate Employment Challenges"

H Yin Qin Qin¹

¹ Beijing Normal University

Potential competing interests: No potential competing interests to declare.

The author generally described some phenomena in terms of issue of employment of university graduates, and giving some suggestions. However, there is no necessary relevant research literature review, and it is not a research paper, but just a general article without positivistic data. The statements as subtitles in the paper are not accurate for employment of university graduates.

And more, the references in the end of paper seem having nothing to do with the contents of the paper.

It is suggested that the author should learn more about policies about university student employment at national and local levels, relevant researches, and study the practical situation about this issue, in a way of positivistic research.
