The study is very significant as it deals with job satisfaction among nurses. I have a few suggestions the authors may wish to incorporate in their manuscript. The abstract should not include any statistics it should give a brief overview of the study and main findings only. The authors may want to concise or shorten the introduction. You may want to add Significance of the study and scope of the study. Managerial Implications and Policy Implications although present could be put in separate sections. Same is the case with Limitations of the Study and Scope for Future Research. Please update the literature and references list if possible. You may also check for English language, spelling, grammar etc. Overall a good study and effort by the Researchers.
