

Review of: "Determinants of Women Entrepreneurs' Business Performance: Evidence from Micro and Small-Scale Enterprises in Arba Minch Town, Southern Ethiopia"

Debbie Christine¹

¹ Universitas Widyatama

Potential competing interests: No potential competing interests to declare.

1. Use literature that is up to date within the last five years
2. It is best not to use the term "significant" in Research Hypothesis (H1-H6) but only use the term "positive". This is because the term significant is used for statistical data processing
3. More explanation regarding problems in economic factors (H1), land premises facilities (H2), ATR (H3), communication and communication skills (H4), LT (H5) and ITA (H6)
4. Conceptual Frame Work: add further explanation regarding Figure 1
5. After processing the data, add further explanation to understand the statistical figures in the economic field so that readers or other writers understand the meaning in terms of statistics and economics
6. Conclusion: to answer H1-H6 sorted according to the hypothesis number to answer the Research Hypothesis.
