Thank you for the opportunity to review this article

The main topic of this study is interesting related mental health support in emergency planning and disaster risk mitigation strategies. However the study is not structured as original research because the methods section is missing. If the study is constructed as editorial or report please make sure that the structure is based on the rule of the article.

The introduction section does not state the number of mental health problems that are suffered by refugees. The statistics of mental health problems stated in the discussion section. The discussion section describes Covid-19 however the mental health in Covid-19 is missing in the introduction section. The introduction and discussion section do not support each other. The program or model to solve mental health problems in disasters is not clear. The researcher should conduct major revision to make the article clear and comprehensive.
