Dear Editor, Dear Authors

the topic of the paper is not only important, but also urgent. But the authors reproduce the Agricultural Targets of Türkiye's National Climate Change Adaptation Strategy and Action Plan 2011-2023 without any interpretative analysis. The paper does not produce added value to the debate and no originality, even in terms of review, because, as mentioned, there is no critical synthesis.

The authors write that <<This study uses a thorough research methodology that combines economic modeling, policy analysis, and literature reviews>>, but there is no trace of economic modeling and political analysis in the paper.

In its current form the paper is not publishable and should be completely rewritten and reformulated.
