

Review of: "Acacia Pycnantha Gum Exudates Recognised As a Traditional Food in Two Countries May Have Economic Potential"

Fitriana Nasution

Potential competing interests: No potential competing interests to declare.

The author said that there is no information about the nutritional value of AP gum; however, the author can put preliminary data. I thought that the author did a preliminary study before publishing this article. This article needs more data to convince people that *Acacia pycnantha* may have economic potential; thus, the author should put more information in the introduction and results parts.
