Potential competing interests: No potential competing interests to declare.

Topic of article is interesting. However, there are few major changes, which need to be incorporated

1. **Abstract:** Sample size, quantitative/ qualitative research, sampling technique etc needs to be mentioned. The theoretical lens through which research model is examined is also missing.
2. **Introduction:** The author suddenly introduced agriculture sector, I think little bit background and reason of agriculture sector needs to be discussed in detail
3. **Introduction:** Most of the arguments are mentioned without proper citation/ reference/ facts e.g. The increase in numbers to provide business opportunities to the community is still a significant problem in developing Micro, Small, and Medium Enterprises (MSMEs).
4. **Literature Review:** This section is weak as no proper arguments are given for how entrepreneurial orientation leads to business performance
5. **Methodology:** Reason to choose for snowball technique is missing. Why authors preferred non probability technique over probability technique
6. **Discussion:** Please add limitations, future directions and so what aspect of results
