

Review of: "The Spherical Horse and COVID-19"

J.M. Jonnalagadda

Potential competing interests: No potential competing interests to declare.

The SIRD model is a classic reference and serves as a base for many of the deterministic models proposed for the COVID-19 spread. In this article, the authors brought to the reader's attention a conceptual shortcoming of the SIRD model.

The article is well-written and the results are significant.
