

Review of: "Studying the Level of Livelihood Vulnerability and the Necessity of the Work Developing a Farmhouse Economic Economic Model to Adapt to Climate Change in the Coastal Area of Ben Tre"

U Ganga

Potential competing interests: No potential competing interests to declare.

Title is very long. Should be brief and inform about the focus of the study in a clear tone

Abstract needs to be revised and include salient observations/conclusions/plan of action suggested based on the study

Methodology is not mentioned regarding survey, sampling, scoring, data analysis, etc. Table 3.3 mentions numbers 1-3, but the basis for this and interpretations made is not mentioned anywhere

What about the impact of climate change on livelihoods for capture fisheries - in terms of changes in fishery resource distribution, effect on spawning, fish species composition changes, etc.? The sentence below needs a relook.

"As for households that catch seafood, the impact of climate change on their livelihoods is not significant compared to households that grow crops and raise aquaculture products. This profession only stops working when there are storms, tropical depressions, rain, strong winds, and tornadoes. Usually, they go to work all the time."

MS requires a major revision.
