Thanks to the authors for the article, which I think will be interesting.

I have mentioned a few points that need to be revised in the article below:

- 1- In the summary, an explanation of the abbreviation PAMP is required.
- 2- In the abstract, the abbreviation made as one of the authors is unnecessary. I recommend that only the full name of the author be written.
- 3- Regardless of the explanations in the summary, abbreviations that do not have an explanation need to be explained again in the introduction.
- 4- I recommend not writing the abbreviations of the names of the cases.
- 5- I recommend reviewing the abbreviations in other sections of the article.
