The article titled "Impact of Environmental Education on the Knowledge and Attitude of University of Benin Students towards Waste Segregation" is a commendable and insightful contribution to the field of environmental education. The study presents a well-structured and comprehensive exploration of the effects of environmental education on the knowledge and attitudes of students at the University of Benin, particularly in the context of waste segregation.

One of the notable strengths of the article is its rigorous research methodology. The authors employ sound research practices, incorporating both qualitative and quantitative approaches to gather and analyze data. This methodological robustness enhances the credibility of the findings and contributes to the scholarly value of the research.

The presentation of results is clear and organized, allowing readers to grasp the impact of environmental education on students' knowledge and attitudes towards waste segregation. The article effectively communicates the significance of the study within the broader context of environmental sustainability and the role of educational initiatives.
