# Apoptotic BCL2L1-Antisense Long Non-Coding RNA

National Cancer Institute

## Source

National Cancer Institute. *Apoptotic BCL2L1-Antisense Long Non-Coding RNA*. NCI Thesaurus. Code C118117.

Apoptotic BCL2L1-antisense long non-coding RNA (~2 kb) is encoded by the human ABALON gene. This non-coding RNA plays a role in the regulation of BCL2L1-mediated apoptosis.
