Thank you for giving me a chance to contribute to your prestigious journal. The under review article explore a very significant issue and most relevant with current economic situation. I have suggested the following some points for improvement the article.

1. The abstract is not attractive due poor language and sentence's structure.
2. The author repeats one in-text citation many times like (Anin et al., 2019).
3. *"The model used for the study followed the work of Olanrewaju (2019), who examines the issues regarding the effects of inflation and the real exchange rate on unemployment. This study adapted the empirical specification and modified it to suit its objectives. The model specified by Olanrewaju (2019) is as follows:"* Need improvement and correction.
4. The author reports many models which create confusion. The author required only report the required model.
5. The author report UNE and sometime Ln UNE. Why?
6. The methodology is too confusing. Please revisit and make it clear.
7. According to author, the ECM value is 1.32% and takes 7 years for adjustment. How? Need explanation and clarification.
8. Revise conclusion and make it attractive.
9. Report findings of the study in conclusion.
10. Improve the recommendations.
