

Review of: "Government expenditure and economic growth: evidence from the critical sectors in an emerging economy"

Emmanuel Edeh Chukwudi¹

¹ Enugu State University of Science and Technology

Potential competing interests: No potential competing interests to declare.

1. The inclusion of the research design in the abstract is not necessary
2. At the fourth line in the second paragraph of the introduction, the sentence that begins with "and" should be revised.
3. Check the punctuations of the sentence line 6 of the second paragraph of the introduction. Lack of good punctuation makes the work "unreadable".
4. Considering the premise you stated in the last paragraph of the introduction, refine the statement of the problem and confine it to recurrent expenditure only, since that is the area you are arguing on in this study
5. State how the study is organized in sections at the end of the introduction.
6. The researcher failed to explain or define the concept of economic growth under the conceptual literature.
7. Current studies on this and related topics are abound in the internet. Please, update the present study using current studies on this topic.
8. Table 2 and Table 3 should be taken to Appendix
9. The statements made by the researcher under Table 3 can be used to form stylized facts which could improve the discussions under the introductory part of the study.
10. Check the referencing of page number on "Babalola, B. T. A., Salako, M. A., Yusuf, S. A. & Egbekunle, S. O. (2015)"
Check.

These points made above would help in improving the quality of the work

Edeh Chukwudi Emmanuel, P.hD.
