Potential competing interests: No potential competing interests to declare.

I would like to praise the author for his effort in writing this paper, that presents undeniable advantages:

- The chronological development of redox flow batteries.
- The extensive references.
- The conclusions regarding the benefits and the shortcomings of redox flow batteries and lithium-ion batteries.
- The presentation of future work of the RFBs.

However, some aspects can be improved, namely:

- The grammatical mistakes.
- Avoiding abbreviated texts.
- Figures could be clearer.
- It is highly recommended to reduce the number of keywords.
