Leucine-Rich Repeats and Immunoglobulin-Like Domains Protein Family

National Cancer Institute

Source

National Cancer Institute. *Leucine-Rich Repeats and Immunoglobulin-Like Domains Protein Family*. NCI Thesaurus. Code C122769.

A family of membrane bound proteins comprised of 15 leucine-rich repeats that are flanked both N- and C- terminally by cysteine-rich regions, three C2-type immunoglobulin-like domains, a transmembrane domain, and a cytoplasmic tail. The members of this protein family may be involved in the suppression of growth factor receptor signaling.
