

Review of: "[Review Article] Green Strategies for the Synthesis of Quinolone Derivatives"

Ishtiaq Jeelani

Potential competing interests: No potential competing interests to declare.

1. Enhance the readership quality of this review article by implementing several recommendations.
2. Revise the title of the review to accurately reflect its content, particularly as it encompasses numerous traditional methods for preparing quinolones.
3. Standardize the presentation of chemical structures by redrawing them uniformly using ChemDraw, thereby ensuring consistency throughout the article.
4. English language needs to be improved with omission of grammatical errors.
