

Review of: "[Review] Optimizing Wastewater Treatment Performance System and Achieving Greater Efficiency to Improve Water Quality for Sustainability — A Review"

C.G. Malar

Potential competing interests: No potential competing interests to declare.

The authors have drafted the review article well. The following comments can be taken into consideration:

1. As the article is dealing with the status in India, it can be mentioned in the title.
2. Few grammatical and typographical errors are noticed. It is to be corrected.
3. Comparison table is to be include.
