The title of this manuscript is "Evaluating the parameter of visibility adopted for CPTED for user safety in the public open space of Haat Bazar: Isovist and VGA." It holds significance in the field of urban design. However, this manuscript needs several improvements, including clarifying your research gap with evidence, adding a more detailed quantitative analysis, and explaining how the literature review relates to your research gaps. Additionally, improving both the recommendations and conclusions sections by providing additional details and being able to produce a clear summary of your work are suggested. These are the suggestions that can significantly enhance your manuscript.

Thank you very much.
