

Review of: "Aligning Government Initiatives with Sustainable Development Goals: A Village-Level Mapping in India"

Asmat Ali¹

¹ Government of Pakistan

Potential competing interests: No potential competing interests to declare.

The study mentions the Indian government's initiatives that are aligned with SDGs and contribute to achieving the SDGs in a village. The study also analyses the problems and issues that are hampering progress in achieving the SDGs in the local context. I think it is an interesting use case to show that other countries facing similar problems and/or at the same stage of SDGs implementation can benefit from the lessons learned/reported in the paper. I think the paper can be accepted for publication.
