Potential competing interests: The paper "Land Size Class Wise Growth of Crop Diversification Index: A Case Study From Murshidabad District of West Bengal" that corresponds to an applied science article, is well written and despite not presenting innovation, it makes a detailed diagnosis of how crop diversification has been happening in regions of Murshidabad District of West Bengal-India and shows the importance of the agricultural diversification from small to larger agricultural producers. Therefore, it is an important article for the agricultural sector in India and must be accepted for publication.
