Potential competing interests: No potential competing interests to declare.

In the current paper, the results proved by the authors are correct and interesting. I request the authors to make revisions as per the detail.

Suggestions or Corrections: -

1. Motivation is not sufficiently stated in the introduction part. It should be clarified why they consider this problem and what advantages it offers.
2. Grammatical and typo errors must be corrected.
3. References should be in a particular format.
4. Authors should revise the Abstract.
5. Authors should cite all the operators and give proper references for the used functions and operators.
6. Authors are advised to remove non-cited references.

With the above observations, I recommend that the article may be accepted for publication after carrying out the suggestions.
