Review of: "NER Sequence Embedding of Unified Medical Corpora to Incorporate Semantic Intelligence in Big Data Healthcare Diagnostics"

Nora Yehia[1]

1 Electronics Research Institute

Welcome My Dear,

After reviewing the paper, I have evaluated it as follows:

- The Abstract is good showing the significant outcome.
- The methodology is clear and is of international.

So, I have recommended the manuscript for publication with some suggestions:

• Authors must use clear the figures shown in experiments for proper rendering of the final published paper and should not distort on zooming.
• The Experimental analysis in the paper is minimal. Authors can present the research with detailed analysis and supportive data.

Best regards,

Dr Nora Yehia,

Researcher at Computers and Systems Department,

Electronics Research Institute (ERI).
