**Potential competing interests:** No potential competing interests to declare.

This paper reviews the existing literature on the application of fly ash in flexible pavement. It is comprehensive and exhaustive. 84 papers have been referred to while writing this manuscript. We appreciate the authors for coming out with this work, which will be beneficial to the civil engineering fraternity. I have no other comment except to accept this for publication.

Before that, please check thoroughly for English. Example: in the abstract, "In the case of flexible pavement, fly ash is used can be used in surface, base, and sub-grade layers," this needs correction. Similarly, there are many locations which need correction.

Once that is done, I have no hesitation to accept the manuscript for publication.
