Gastric Intraepithelial Neoplasia

National Cancer Institute

Source

National Cancer Institute. *Gastric Intraepithelial Neoplasia*. NCI Thesaurus. Code C3955.

A intraepithelial neoplasia (dysplasia) that arises in either the native gastric mucosa or in metaplastic gastric epithelium. It has a flat, polypoid or slightly depressed growth pattern. It is graded as low grade (mild dysplasia) or high grade (moderate dysplasia and carcinoma in situ). (WHO, 2000)
