Potential competing interests: No potential competing interests to declare.

Thank you for giving me the opportunity to read this paper.

- The positioning of the paper is not entirely clear. It is better to explain the gap in this article further.
- Poor Introduction: After reading the introduction, I was unfortunately left with the feeling of "so what" as it did little to increase my interest in reading the remainder of the paper. Please focus the Intro much more on convincing readers that your study is needed and has the potential to add significant contributions. The importance and necessity of the issue is not stated, innovation and the exact purpose is not clear!
- The discussion challenges your findings and determines the degree of compatibility with previous research.
- What are the theoretical and practical implications of your study and which limitations and possible future research emerge from it?
- The sources used are old and the authors should use the sources (2022-2023).
