

Review of: "The Application of PROMETHEE with the recalculated weight method as a more accurate measurement for the selection of the best Hybrid Renewable Energy Technology for a slum building"

Himanshu Prajapati

Potential competing interests: The author(s) declared that no potential competing interests exist.

- The abstract is not clear. It should summarize the manuscript based on the IMRaD structure (i.e., introduction, methods, results, and discussion)
- The current introduction is weak. A Lot of ideas in introduction is creating confusion. The motivation is not clear. Develop the theoretical debate nicely. Also, there is lack of connections in between sentences, especially in 1st 4 paragraphs.
- The Introduction section should be improved by better highlighting which are the main contributions of the paper.
- The differentiation of your work with other literatures is not clear, and should be clearly highlighted.
- In section 3.6.1. Step 1. Formation of a decision matrix: The decision matrix is obtained from the optimization result from the application of the HOMER software and the evaluation of the qualitative criteria weight by experts. Please specify who the experts are and how you have reached to this decision?
- The paper should clearly identify any implications for research, practice and/or society
- The conclusion section is missing.
