Review of: "Adoption of Technology Acceptance and Interfaces for Academic Information System Applications"

Sonia Janneth Limas-Suárez[1]

1 Universidad Pedagógica y Tecnológica de Colombia

Potential competing interests: No potential competing interests to declare.

It is an interesting and impactful topic.

It is recommended to include the documentary or literature review in the analysis and contributions of previous results and then counterbalance them with the results of the study.

The objective of the study is important to propose actions based on the results and generate new knowledge. In this way, the study does not remain only descriptive.

The conclusions must be strengthened by the results obtained.

The study is interesting.
