Review of: "Benefit distribution and stability analysis of enterprise digital servitization ecosystem from the perspective of value co-creation"

Edson Ursini[1]

1 Universidade Estadual de Campinas

General: improve the notation and description of equations;

Draw attention to the title: Capitalize "Digital Servitization Ecosystem";

Correct keywords: write together "Digital Servitization Ecosystem" without semicolons;

With three or more authors, should we include et al.? Or just with four or more authors? There are several cases that must be analyzed;

Pg. 4 – There are two Liu et al. 2022. Check the correctness;

Pg. 5 – Improve the first sentence on this page;

Pg. 5 – Last sentence: remove a "provide";

Table 1: reference dates are not in blue;

Pg. 7 and 8 – Justify the text;

Pg. 10 – 'S' must be uppercase or lowercase?

Equation (1): the sum is wrong: would si belong to S? Would the line be perpendicular to w(s|i)?

See the issue of uppercase and lowercase letters;

Error in equation (3): it must be "kid";

Pg. 12- "Herfindhal-Hirschman" does not appear in the references;

Figure 2: Called DSE and therefore DSIE in the figure;

Pg. 14 – equation (10): say that an asterisk is the conventional Shapley;

Definition 1, Definition 2: uppercase or lowercase n?

See first paragraph pg. 15;

Pg. 16 – 5.1 – Case study: model ({1,2,3},v)? or (i,v);

Table 3: Tripartite collaboration: why v(s-k) = 400?

Explain the creation of Table 4;

Table 5: DSE or DSIE?

After Table 5: put "In the Table 5, 5-4 points...;

Pg. 18 – explain how you arrived at "provider B is 0.73";

Pg. 18 – with the previous case analysis;

Correct title (font size) of Figures 3, 4 and 5. Text also needs to be enlarged;

Evaluate table titles (font size);

Before Section 6 – Conclusions, place a Discussion Section. This reduces the size of Conclusions;

Pg. 23 – error: "benefut";

Two references Liu 2022. Name a) and b)?

Suggestions:

Pg. 6 – "...of the above relevant..." "...of the previous relevant...";

Before item 4.2.1 - .. the above factors..." ...the previous factors...";

Pg. 16 - Item 5.1.1 – "to the previous data".
