Potential competing interests: No potential competing interests to declare.

This article is well-researched and provides valuable insights into the integration of AI in academic research. With some refinements, it can be even more impactful and accessible to a broader audience. Here is my two cents:

Consider making the title more concise while retaining its essence. For example: "Responsible AI in Scholarship: Assessing Generative Models and Best Practices."

The abstract is comprehensive but could benefit from further condensation. Aim to provide a succinct overview that captures the essence of the research without delving into too much detail.

you need more context about the current state of AI in academia in your paper.

In the discussion delve deeper into the implications of the findings. Discuss potential future trends and how they might impact the integration of AI into academic research.
