Potential competing interests: The author(s) declared that no potential competing interests exist.

General presentation: The writing is clear, and well organized. All sections of the manuscript consistently reflect the major point.

1. I'm not able to see tables.

Abstract accurately reflect and summarize the paper.

Introduction: The research question or hypothesis clearly stated.

Methods are valid for the question asked.

Statistical design: Did you calculate power analysis? Sample size is then adequate?

Results and data: Data are not clearly summarized because is not possible so see tables. Moreover, you should go more deeply on BMI.

Did you stratify your results according to BMI? What are mean BMI patients?

Discussion is complete and limitations of the study noted.

References are pertinent and current.
