Potential competing interests: No potential competing interests to declare.

I have carefully reviewed your research article titled "Procurement Planning & the Rwanda Biomedical Centre (RBC)". Overall, the paper presents a commendable level of clarity in its language, well-defined objectives, and a clear elucidation of the study's significance. The introduction is particularly well-written, offering a strong foundation for the research. However, several points need to be considered to enhance the overall quality of the paper:

Literature Review: While the paper's language is clear, the literature review needs strengthening. The inclusion of more relevant studies would enrich the theoretical framework and provide a more comprehensive understanding of the research context.

Methodology: The researcher indicated the use of a multiple regression model in the methodology section, this is missing in the analysis part. Please ensure that the stated methodology aligns with the actual analysis conducted.

In the data collection section, its unclear which factors were derived from the literature and which were added based on interviews or qualitative data. Additionally, details on the reliability and validity of the scale used are missing.

Findings and Discussion: The findings and discussion section primarily relies on frequency and percentage analyses. To enhance the depth of your analysis, consider exploring additional statistical methods or delving into the implications of the results.

Inconsistency in References: There appears to be inconsistency in the references. Please review and ensure that all citations are accurate and consistently formatted.

Enhancements for Quality: Incorporate practical implications of your findings, illustrating how study can be applied in real-world scenarios. This addition will provide a more comprehensive understanding of the study's significance.

Include a section on the future scope of the research to highlight scope for further investigation, contributing to the paper's completeness.

Considering these points, I recommend that the paper for major revision. Specifically, focus on refining the objectives, aligning the research methodology with the analysis, and providing more detailed insights in the results section.
