Potential competing interests: No potential competing interests to declare.

- The scientific names of plants should be written in italics.
- There are some grammatical mistakes that need to be corrected.
- The first name of the author should be removed from text references and written in full in different subtitles.
- References should be given when mentioning the structure of different phytochemicals.
- The references need to be arranged in a more proper way, and up-to-date references should be used.

The paper can be accepted after these minor revisions are made.
