

Review of: "Application of Ensemble Learning in CXR Classification for Improving COVID-19 Diagnosis"

Dr. Sana Yasin

Potential competing interests: No potential competing interests to declare.

The introduction needs to clearly state the significance of the study and how it contributes to existing research on COVID-19 diagnosis using CXR classification.

The methodology section should provide a more detailed explanation of the ensemble learning techniques and justify their selection.

The results should include comparisons with baseline models to highlight the improvements achieved.

The discussion should acknowledge the limitations of the study and suggest areas for future research.
