Appreciate the authors' effort in this rigorous review on phytodrug effect on bacterial strains. However there will be major revisions required for publishing the articles. Please find the revisions below,

1. Title should be shortened.
2. Inadequate literature survey on the mechanism of phytodrug effect towards growth inhibiting enzymes of the bacterial strains.
3. Inadequate literature survey on antibiotic and phytodrug interaction.
4. Less number of figures and tables showing the statistical result.
5. No figures on showing the ZOI and MIC for phytodrugs.
6. Manuscript language needs to be improved.
