Potential competing interests: No potential competing interests to declare.

1. Why is it necessary to have so many strategies for the evaluation of methodology? Explain the purpose behind the undertaken methodologies?
2. The manuscript requires revision to improve the quality of English.
3. Check that all references cited in your article, and citation order, are sequential. Add 5 to 10 recent references.
4. Mention the research gaps in current understanding because the introduction needs improvement with a literature review.
5. The problem definition of this work is not clear. In Sect.2, the drawbacks of each conventional technique should be described clearly.
6. Quantitative values for the existing and the proposed work have to be tabulated for better understanding.
7. Mention the substantive discussion, including lessons, implications for theory and practice, next steps, and limitations.
