

Review of: "The Choice of Breeding Objectives and Selection Criteria Decided by Breeders of Various Goat Breeds and Factors Influencing Them"

Zakia Himeur

Potential competing interests: No potential competing interests to declare.

I would like to congratulate the authors for their hard work. To improve the scientific quality of the manuscript and its publication, I suggest the following points:

Generally speaking, a thorough proofreading with a linguistic revision of the document is essential.

Revise the title. With reformulation, the title will appear better and more explicit.

Fellow reviewers made valuable amendments in terms of methodology and statistical processing. I must not exaggerate in this sense.

The level of education and training of the breeders should be taken into consideration in your research. It is a determining factor in the perception, objectives, and decision-making of breeders.

The implementation of recording tools at the farm level is systematic.
