Autoimmune Polyglandular Syndrome

National Cancer Institute

Source

National Cancer Institute. <u>Autoimmune Polyglandular Syndrome</u>. NCI Thesaurus. Code C129726.

A group of diverse conditions that are characterized by spontaneous, multi-organ autoimmunity, which target both endocrine (adrenal, gonad, pancreatic islet cells, parathyroid, pituitary, thyroid) and non-endocrine (gastrointestinal, integumentary, lymphatic) tissues.
