Potential competing interests: No potential competing interests to declare.

1. This suggestion aims to enhance the clarity and specificity of the statement by providing a more precise statistic about the prevalence of PFDs among women.
2. Provide a more recent and relevant statistic to support the prevalence of PFDs in the Philippines.
3. More detailed and comprehensive overview of the components of the current treatment for PFDs.
4. Clarify and specify the focus of the study for better understanding and alignment with the research objective.
5. Can be a more concise and direct statement about the research design and its purpose.
