Potential competing interests: No potential competing interests to declare.

An interesting topic to explore on gender's roles in the transport sector. I believe the article is ready to be published with good explanation on the topic. However few amendments need to be clarified as follows:

(1) The statement '*Women come out for less important tasks*'- this statement requires explicit explanation on how important it is to the research scope. A clear justification on why it is crucial to consider this kind of statement.

(2) The need to update more recent references. Especially in the literature review.

(3) Suggest could perhaps explain the interview protocol in the method applied.

Overall, has a strong potential to be published.
