**Potential competing interests:** No potential competing interests to declare.

The article presents a compilation of some of the competency frameworks in different fields. It is a basic review of the literature that demonstrates the relevance of developing a framework. It is suggested to correct the names of the frameworks related to the European Commission's digital competences as they both start with "Dig", not "Digi". On the other hand, it is also recommended to review the work done by the European Commission on competences, knowledge, and skills in the framework of the ESCO initiative (European Skills, Competences, Qualifications and Occupations).
